

EZ CLEAN AG

DESCRIPTION

EZ CLEAN AG is a high-foaming chlorinated alkaline cleaner designed for use in the swine, poultry, various agricultural and food processing industries. Removal of a wide variety of organic soils is swift and complete. **EZ CLEAN AG** rinses quickly leaves no hard water films and is biodegradable.

USE INSTRUCTIONS

EZ CLEAN AG was designed to be used through proper foaming equipment, or as a soak cleaner for miscellaneous parts and equipment. Dilution rates will vary based on soil loads and use conditions. Typically this product should be used @ 5 - 8 oz per gallon, or as instructed by your local representative. A thorough pre-rinse to remove loose extraneous debris prior to foaming is recommended. Apply a blanket of foam over area to be cleaned and allow @ 15 - 20 minutes contact. Do not allow foam to dry on surface. Keep room moist. Thoroughly rinse.

PHYSICAL CHARACTERISTICS

Color a clear to pale yellow solution
Foam high foaming
Rinses quickly and easily
Biodegradable
Moderate alkalinity

SAFETY

EZ CLEAN AG is a chlorinated alkaline solution. Please use all appropriate safety equipment (PPE) to prevent skin and eye contact. SEE MSDS or contact your local representative for further information.

CONTAINERS

This product is available in multiple package sizes (5 or 55 gallons). Please contact your local representative for available packaging in your area.

PRODUCT DATA SHEET

All information is offered in good faith and is believed to be reasonable correct. Conditions of use are beyond our control and all risk of use are assumed by the user. User should establish the correct concentration for specific needs.

200

Disinfectant / Sanitizer

INCREASE YOUR BIOSECURITY

I. Product Information

Disinfectant/Sanitizer 200 is a 4 chain split quaternary ammonium based disinfectant with a dilution rate of 1 ounce per gallon of water (1:128 at 800ppm). **Sanitizer 200** has a broad range of effectiveness in killing all types of unwanted organisms that effect the health of you animals.

Sanitizer 200 is most effectively used as a disinfectant when applied by means of foam application after the barn has been thoroughly cleaned. Foam application gives you a visual marker and the extended contact time which increases the kill rate of unwanted organisms and bacteria.

Sanitizer 200 has many advantages; it is odorless, non-toxic, harmless to the skin, non-corrosive, non-staining, very high in germicidal strength, and stable in storage.

II. Test Work

Sanitizer 200 has been officially tested by the methods of the A.O.A.C. (Association of Official Analytical Chemists). Under these test methods **Sanitizer 200** has proven effective against these resistant main organisms, and many more.

Aerobacter aerogenes	Penicillium notatum	Streptococcus faecalis
Aspergillus niger	Pityrosporumovale	Streptococcus pyogenes C-203
Bovine Rhinotracheitis	Porcine Parvovirus	Streptococcus viridans
Brucella abortus	Pseudomonas	T.G.E.
Clostridium sporogenes	Pseudorabies virus	Trichophyton interdigitale
E. Coli, Salmonella, Listeria	Saccharomyces cerevisiae	Various environmental molds
Enterobacter	Salmonella, gallinarum & pul- lorum	
Klebsiella pneumoniae	Salmonella, schottmuelleri & typhimurium	
Lactobacillus casei	Shigela sonnei	
Monilia albicans	Staphylococcus	
Pencillium luteum	Streptococcus
